Handcrafted quality. Technical precision. A timeless and classic beauty. These are all hallmarks of Maximum® weather instruments. For generations, Maximum has developed a reputation for reliability, accuracy, and customer service that sets us apart. Our instruments adorn the finest homes with a distinctive style that makes an elegant addition to any room.

We appreciate your interest in Maximum weather instruments. On the following pages, you will find a selection of our instruments and weather stations. To see our complete range of weather products, and to learn more about product details and specifications, please visit us at www.maximum-inc.com.
For more than 45 years, Maximum has set the standard for elegant craftsmanship and technical precision. Our weather instruments feature professional quality movements with accuracy that has been tested and proven in many critical commercial applications.

Today, Maximum instruments are still built by hand at our headquarters in New Bedford, Massachusetts. We ship each instrument complete with all necessary sensors, cables, hardware, and batteries. Our customers can be sure that every Maximum instrument is backed by our solid commitment to quality, accuracy and superior service.

Professional monitors wind, temperature, barometric pressure, time, indoor temperature, and indoor humidity. **Professional $2,150.**
LIMITED EDITION MONTAUK CLASSIC

Montauk Classic $1,850.

Introduced in the late 1970’s, Montauk holds the distinction of being Maximum’s single most requested weather instrument arrangement. This commemorative edition brings back the look of the original instrument dials we used more than 30 years ago, each discreetly imprinted with the words “Limited Edition”.

Each of the brass cases utilizes a unique titanium-based PVD treatment making them virtually tarnish-proof. We have tested cases treated with this finish in a harsh saltwater environment, for the equivalent of 10 years, with no noticeable change in appearance. Completing the weather station’s original “classic” look is a lighter finished, more detailed, solid mahogany wall-mounting panel.

MOUNTING PANELS & OPTIONS

While your Maximum instruments come with all the necessary sensors, cables, power supplies, including batteries, you may wish to add an accessory item or change components. Maximum carries a wide range of accessories for almost every weather instrument. Price information for Maximum accessories is available on www.maximum-inc.com. If you have any questions about which accessory is appropriate for your instrument, please contact us for assistance. Our team will be glad to help.

MOUNTING PANELS

Oak, mahogany and unfinished oak panels for 1 to 6 instruments. Key-holed on the back for wall hanging. Pre-drilled on the front to allow instruments to be mounted either vertically or horizontally.

INSTRUMENT CASES

Instrument cases are available in brass, chrome, or satin nickel. (Additional $25 per instrument for chrome or satin nickel.) Cases may also be ordered with our titanium-based “PVD” finish, which makes it virtually tarnish-proof. (Additional $100 per instrument for PVD finish.)

INSTRUMENT DIALS

Instrument dials are available in spun aluminum with black numerals or in matte black with white numerals. Digital instruments are black dial only.

BRASS PLAQUES

Solid brass, engraved plaques for mantle mount or multi-instrument panels. Engraved message up to 40 characters (including spaces). Makes an ideal commemorative gift.

Brass Plaque, $25.
